

*'Tis the Season...*

# 12 SCAMS OF CHRISTMAS

How Small Businesses Can Stay Safe

## Phishing Emails with Holiday Themes

Scammers send fake holiday-themed emails posing as charities, retailers, or delivery services to trick employees into clicking malicious links.

## Charity Scams

Scammers send fake holiday-themed emails posing as charities, retailers, or delivery services to trick employees into clicking malicious links.

## Fake Invoices

Fraudsters send realistic-looking fake invoices, hoping busy finance teams will pay without verification.

## Wi-Fi Eavesdropping

Public Wi-Fi networks expose your business data to hackers monitoring unsecured connections.

## Gift Card Fraud

Cybercriminals impersonate executives, asking employees to purchase gift cards and share the redemption codes.

## Holiday Shopping on Work Devices

Personal holiday shopping on work devices can lead to malware infections and compromised business data.

## Shipping Notification Scams

Fake shipping alerts contain malicious links or attachments, exploiting increased holiday delivery activity.

## Spoofed Websites

Scammers create fake versions of popular retailer websites to steal payment details or install malware.

## E-skimming on Payment Portals

Hackers insert malicious code into online payment systems to steal customer credit card information.

## Tech Support Scams

Fraudsters impersonate IT support teams, claiming urgent system issues to gain access to sensitive systems.

## Holiday Social Media Scams

Fraudulent giveaways or contests on social media are used to steal personal information or spread malware.

## End-of-Year Tax Scams

Cybercriminals pose as the IRS, demanding immediate payment or sensitive business information during tax season.
